

Sanitary Vent /Breather Housing

This Sanitary Stainless Steel Vent housing constructed of 316L stainless steel for high purity air applications. The housing allows venting of large and small tanks. The housing comes in 5" to 20" sizes and 1 round or 3 round to meet the needs of your application. The design provides a clean and easy way to provide Sterile Air Venting into tanks..

The housing supports code 7 with 226 o-rings. It provides a positive seal on the filters that will prevent any microbial bypass. The housing is sealed by the use of a tri-clamp that requires no special tools to open or close.

<u>Materials of Construction</u>	
Head:	316L Stainless Steel
Bowl:	316L Stainless Steel
Option:	304 Stainless Steel
Clamp:	304 Stainless Steel
	O-Rings: Silicone, EPDM, Viton, PTFE
<u>Dimensions (nominal)</u>	
Lengths: 5 in., 10 in., 20 in., 1 round & 3 round option	
<u>Connections</u>	
Inlet/ Outlet: 1.5" TC, Flange option	
<u>Finish</u>	
<20 Ra Interior, <32 Ra Exterior, Electropolished	
<u>Operating Conditions</u>	
Max operating pressure: 145 psi (10Bar)	

Tank Vent For:
Pharmaceuticals
WFI
Fermentation
Process Water

Features	Benefits
<ul style="list-style-type: none"> ■ Wide Chemical & Thermal Compatibility 	<ul style="list-style-type: none"> ■ Provides excellent compatibility with a wide range of tank configurations. ■ The Electropolished finish eliminates possible contamination
<ul style="list-style-type: none"> ■ Tri-Clamp 	<ul style="list-style-type: none"> ■ The housing allows for inspection of the filter before the housing is sealed. ■ Ease of filter change-out
